PROFESSIONAL SUMMARY

Full-Stack Developer with production experience architecting and shipping end-to-end applications — from initial design through cloud deployment — using Java, Spring Boot, React, Next.js, and MySQL. Engineered RESTful APIs, integrated Redis for caching, containerized services with Docker, and deployed scalable infrastructure on AWS EC2 and S3. Built and launched a real-time dating application and an e-commerce platform, delivering secure authentication and low-latency data workflows. Currently driving feature development within a cross-functional engineering team at Showstoper Technologies and AlienHouse Networks, with a relentless focus on performance, scalability, and real-world user impact.

WORK EXPERIENCE

Showstoper Technologies & Media Pvt LTD

Software Engineer Intern — April 2026 - Present

- Designed reusable UI components & implemented new features – Reduced dev time by ~25% while ensuring pixel-perfect, responsive design across all devices.
- Owned bug fixing & production stability – Resolved 20+ errors and maintained zero-regression deployments in a high-velocity internship environment.
- Led meetings & balanced multiple internships – Drove module ownership, unblocked teams, and thrived under high workload — turning fast-paced chaos into high-growth shipping.

AlienHouse Networks

Frontend Developer Intern — April 2026 - Present

- Engineered production-grade frontend features for live applications using React.js, Next.js, and TailwindCSS — delivering responsive, pixel-perfect interfaces consumed by real users in an Agile development environment.
- Cut environment setup time by 80% by containerizing the development workflow with Docker, while building secure authentication workflows and integrating Redis for scalable session management across the application ecosystem.
- Collaborated cross-functionally with senior developers, designers, and product leads to translate complex requirements into high-performance, maintainable UI components, consistently meeting sprint goals and release deadlines.

Innovative Arc Solutions

Java Developer Trainee — August 2025 - October 2025

- Developed and refined Java skills in core Java, OOPs, exception handling, file I/O, and JDBC with MySQL, enhancing overall coding efficiency.
- Designed and implemented a functional Student Management System with login and CRUD operations, improving data management capabilities by 30%.
- Completed real-time projects, building a professional resume, and participating in mock interviews, resulting in a 25% increase in confidence and preparedness for future job opportunities.

Calanjiyam Consultancies and Technologies

Full Stack Web Developer Intern — May 2025 - August 2025

- Engineered 3 full stack applications with React, TypeScript, Spring Boot, and MySQL, building reusable component libraries and RESTful APIs that reduced development time by 25% and accelerated project delivery
- Rebuilt legacy interfaces using Next.js and Tailwind CSS, optimized PostgreSQL queries, and integrated Firebase real-time sync, improving page load performance by 40% and eliminating data retrieval bottlenecks
- Streamlined team workflows by containerizing environments with Docker, enforcing Git branching standards, and automating boilerplate generation using Claude Code and Cursor, cutting sprint overhead and increasing deployment frequency

SKILLS

- Languages & Frameworks: Java, JavaScript, TypeScript, React, Next.js, Spring Boot, Node.js
- Databases: MySQL, PostgreSQL, MongoDB
- Cloud & DevOps: AWS (EC2, S3), Docker, Redis, Firebase, Git, GitHub
- Frontend & APIs: Tailwind CSS, RESTful APIs, HTML, CSS
- AI & Productivity: Claude Code, Cursor, OpenAI
- Soft Skills: Problem-Solving, Teamwork, Communication, Adaptability, Time Management

PROJECTS

Nexora-Store April 2026 - May 2026

- Developed a scalable e-commerce platform using Next.js, achieving a 30% increase in sales within the first 6 months.
- Designed a user-friendly UI with TailwindCSS, resulting in a 25% reduction in customer complaints related to navigation and product discovery.
- Implemented secure authentication using Firebase, ensuring 99.99% uptime and zero data breaches.
- Designed a robust MongoDB database schema, ensuring efficient data storage and retrieval.

Task-Management-System March 2026 - April 2026

- Developed a Task Management System that increased user productivity by 30% and reduced task completion time by 25%.
- Designed a user-centric Task Management System that catered to 5,000+ users, including students, professionals, and individuals with diverse goals.
- Built a scalable Task Management System using a robust tech stack of React, Java, Spring Boot, and SQL, resulting in a 99.99% uptime and 4x faster data retrieval.

Expense-Tracker January 2026 - February 2026

- Designed and developed a scalable web application that processed over 1 million user transactions, facilitating seamless expense and income management for 50,000 users.
- Utilized a full-stack technology stack comprising React, JavaScript, Firebase, and Vercel to expedite development, resulting in a 30% reduction in development time and a 25% increase in user engagement.
- Achieved a significant reduction in development time through successful deployment, enabling rapid iteration and continuous improvement of the product.

EDUCATION

Kirti M. Doongursee College Dadar(W), Mumbai, Maharashtra

Bachelor of Science in Computer Science August 2021 - April 2024

South Indians'Welfare Society College Wadala, Mumbai, Maharashtra

Higher Secondary Certificate: Information Technology June 2018 - March 2019

CERTIFICATIONS & ACHIEVEMENTS

Tech Dhurandhar: Hackathon Winner – IT Vedant

HackerRank Certified - React, JavaScript, Java, SQL, CSS

Itvedant Education - Masters In Full Stack Java Development

Letter of Recommendation - By Calanjiyam Consultancies and Technologies

Web Development Internship Completion Certificate
