

Blog Component Using JSX, Inline Styles, and External CSS Student Details

Name: _____ Course: _____ Subject: React JS

Assignment: Blog Component Date: _____

1 Objective

To create a React functional component named Blog that renders static blog details including:

Title

Author

Description

Image

The component must use:

JSX

Inline Styling

External CSS Styling

2 Blog.js Code // Blog.js import React from "react"; import "./Blog.css";

```
function Blog() {
```

```
  var title = "10 Tips for Effective Time Management"; var author = "John Doe"; var  
  description = "In today's fast-paced world, effective time management is crucial for  
  success. Learn 10 tips to improve your time management skills and boost  
  productivity."; var image = "https://via.placeholder.com/150";
```

```
  const containerStyle = { backgroundColor: "#f4f4f4", padding: "20px", borderRadius:  
  "10px", width: "400px", margin: "20px auto", textAlign: "center", boxShadow: "0 4px  
  8px rgba(0,0,0,0.1)" };
```

```
  const titleStyle = { color: "#2c3e50", fontSize: "22px", marginBottom: "10px" };
```

```
  const authorStyle = { color: "#7f8c8d", fontStyle: "italic", marginBottom: "10px" };
```

```
  const descriptionStyle = { color: "#34495e", fontSize: "14px" };
```

```
return (
```

```
{title}
```

```
By {author}
```

```
 Blog Thumbnail
```

```
{description}
```

```
); }
```

```
export default Blog; 3 Blog.css Code /* Blog.css */
```

```
.blog-container { border: 2px solid #3498db; }
```

```
.blog-image { width: 150px; height: 150px; margin: 15px 0; border-radius: 8px;  
border: 1px solid #ccc; }
```

```
.blog-container:hover { transform: scale(1.02); transition: 0.3s ease-in-out; } 4 App.js  
Code // App.js import React from "react"; import Blog from "./Blog";
```

```
function App() { return (
```

```
); }
```

```
export default App;
```
